

Migrate to the New Intune Company Work Portal for Android Devices

Disclaimer: These instructions are for Mobile Devices previously enrolled in the Company Portal App. If the Android device does not have Company Portal installed, search for Intune Company Portal in your Android's Play Store.

STEP 1:

Open the Company Portal app on your Android device.

STEP 2:

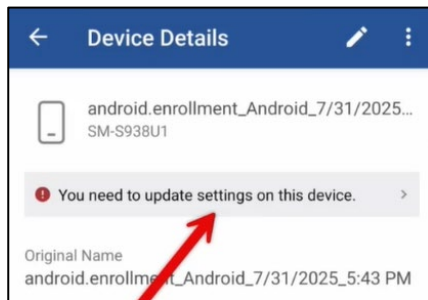

Select the **DEVICES** tab (center)

The red exclamation point indicates your device is out of compliance. Tap the displayed text to begin the update.

STEP 3:

Select **You need to update settings on this device.**

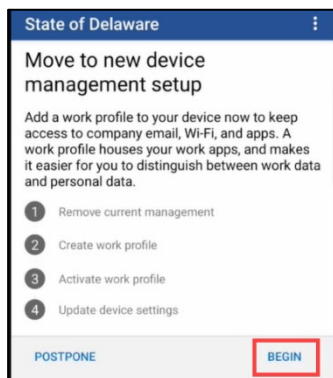

And then click on **RESOLVE** at the bottom of the next screen to begin the new policy setup.

STEP 4:

To proceed, select **BEGIN** and follow the guided screen prompts.

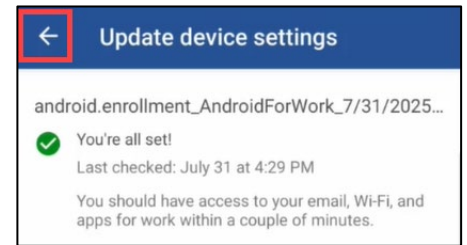

Once the App has completed steps (1) "Remove current management" and (2) "Create work profile", you will be asked to authenticate with your State credentials.

Next, the App will (3) "Activate work profile" by registering your device. Lastly, (4) "Update device settings." This step will take several minutes.

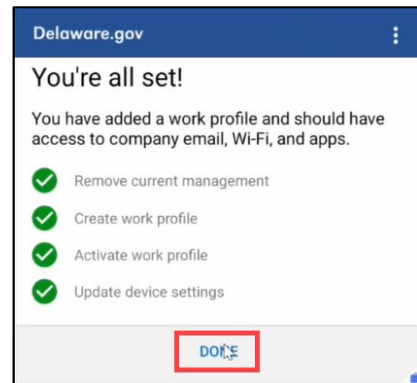

STEP 5:

Once the screen indicates "You're all set!", **TAP** the back arrow to go back to the previous screen.

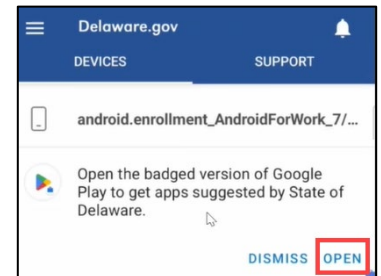

STEP 6:

Select "DONE" to finish the set up.

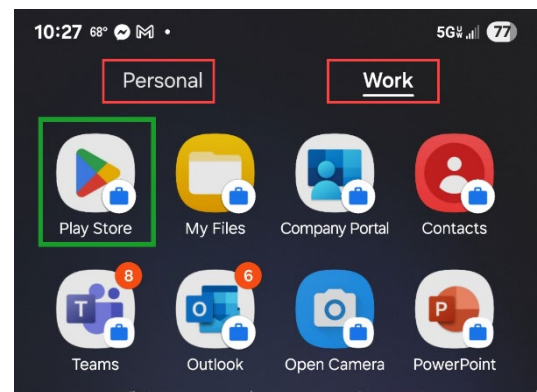

STEP 7:

To install Microsoft apps like Outlook, Teams, or other work apps, select **OPEN**.

STEP 8:

Once the Android device completes the installation, the device will segregate Personal Apps from Work Apps. In the Work section, a distinct Play Store icon will be available for downloading Work Apps.
